IDENTIFIERS *Mount San Jacinto College CA

ABSTRACT

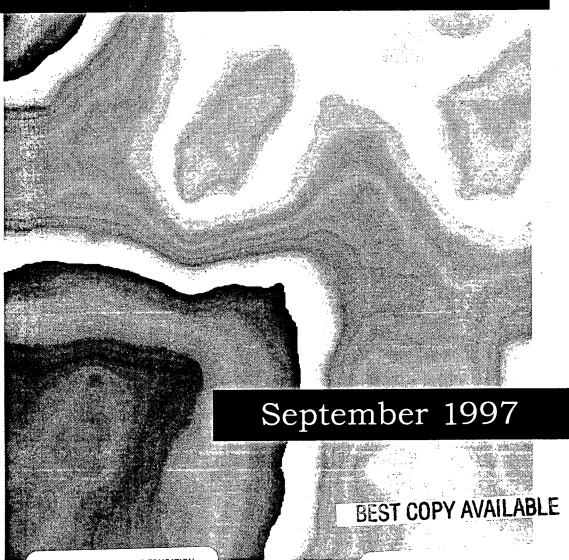

The Student Equity Plan developed by California's Mount San Jacinto College (MSJC) is intended to ensure equal access of historically underrepresented and ethnic minority students. This update provides current information on the goals and activities involved in the plan. An executive summary reviews state legislation mandating the development of student equity plans, the goals and initiatives of the plan, and student equity indicators used at MSJC. The second section provides background information in the plan's development, and the third offers suggestions for improving campus climate. The fourth section discusses student access at MSJC, illustrates the percentages of ethnic groups in the college service area and student body, and suggests that the college's funding be increased in order to adequately serve all students. Sections five through eight offer data by ethnic group and gender on basic skills completion, successful course completion, degree and certificate completion, and transfer. The final sections describe MSJC's completed goals and its annual review model. Appendices include an agenda for Pre-College Day, entitled Dimensions of Diversity, and memoranda related to student equity. (YKH)

t is the mission of Mt. San Jacinto College to provide excellent academic, career and life-long learning programs in a student-centered environment while meeting the needs of the diverse communities and populations served, and to promote the cultural and ethnic diversity of students and staff. As a major community resource, the college also provides programs for personal enrichment and cultural opportunities for the entire community.

Executive Summary

Legislation

The Student Equity Policy adopted by the Board of Governors in September 1992 requires districts in the community college system to develop student equity plans. The intent is to assure that the college population reflects the diversity of the college's demographic area and to increase the access, success, transfer, and completion of degrees and certificates of historically under-represented and ethnic minority students. During Spring 1993, the Chancellor's Office of the California Community Colleges established regulations on student equity, mandating the development of student equity plans. The definition of "Student Equity" can be found in Subchapter 4, section 54220, Division 6 of Title 5 of the California Code of Regulations.

Goals and Initiatives

The majority of historically under-represented students currently enrolled in higher education are enrolled in community colleges. Consequently, the success of these students depends upon the community college system's ability to retain and educate them. After seeking input from all college sectors, the Student Equity Committee has identified barriers and set goals in order to assure that all students and potential students of Mt. San Jacinto College, specifically those who have been historically under-represented in higher education, feel welcome and have equal opportunities for educational success.

The Student Equity Plan Update addresses the following indicators: Campus Climate, Access, Basic Skills and ESL, Course Completion, Degrees and Certificates, and Transfer. Each section of the plan begins with a chart which includes and explains the research. Following each chart is a section entitled Research Implications which summarizes the data. Then the Goals are presented with charts which identify barriers, implementation strategies, accountability, timeliness, resources, and evaluation benchmarks. To complete the review of Barriers established by the College for the Student Equity Plan Update, all employees, departments, and committees named in the report received highlighted sections of the report for their review. Several follow-up reminders were then sent, as well as a general memoranda to all college employees allowing those not named in the reports' accountability sections to contribute.

The following goals serve as student equity indicators:

• Campus Climate:

To enhance the campus climate at MSJC so that all students and employees feel welcome; To increase awareness of and sensitivity toward historically under-represented groups among all students and employees

Access:

To establish an ethnic distribution of enrollment that reflects the adult population of our service area by 2000; To increase college funding base so that all students, specifically historically under-represented students, have access to college.

ပ

Basic Skills:

To improve by 5% a year the percentage of students who successfully complete the degree-applicable course in English within six semesters of having completed the final ESL course; To improve by 5% a year the percentage of students who successfully complete the degree-applicable course in English and math within six semesters of having completed the final basic skills course

Successful Course Completion:

To increase completion rates by 5% a year for each historically under-represented group; To reduce the difference between all groups to a maximum of 10% by 2000; To maintain standards of rigor throughout the process

Degree and Certificate Completion:

To increase the total number of degrees and certificates awarded by 10% a year; To ensure that the ethnic distribution of degree and certificate recipients is equal to the enrollments four years earlier

Transfer:

To increase by 5% a year the number of students who transfer; To ensure that the ethnic distribution of transfer students is within 2% of the enrollments four years earlier

The Student Equity Committee oversees efforts to achieve these goals.

Resources

The offices and departments responsible for the implementation of goals are responsible for seeking appropriate funding avenues for the achievement of these goals. The Student Equity Committee monitors implementation, accountability, target completion dates, and evaluation benchmarks.

Conclusion

It is the mission of Mt. San Jacinto College to provide excellent academic, career and life-long learning programs in a student-centered environment while meeting the needs of the diverse communities and populations served, and to promote the cultural and ethnic diversity of students and staff. As a major community resource, the college also provides programs for personal enrichment and cultural opportunities for the entire community.

The Student Equity Plan reflects the college community's involvement in and commitment to this purpose.

For additional information about Mt. San Jacinto College's Student Equity Plan, please contact Dana Reece Baylard in the Office of Institutional Advancement, Institutional Research.

Introduction and Background

Plan Development

This plan exemplifies the collaborative work of representatives from all college constituencies, originally led by the Student Equity Committee, a committee comprised of students, faculty, staff, and management. The initial charge of the committee was to develop a Student Equity Plan that would be reviewed and revised within the college's shared governance procedure.

Mt. San Jacinto College has designated student equity as a significant part of the ongoing planning agenda coordinated by Institutional Research to insure wide range involvement of all segments of the campus. The focus of student equity planning has been to assure equal access while maintaining excellence in academic standards.

Methodology and Limitations

The State recommended student equity indicators were utilized to guide student equity research at Mt. San Jacinto College. Research focused on area demographics, student body demographics, ESL and basic skills completion rates, successful course completion rates, degree and certificate completion rates, and transfer rates.

Completed Goals

The 1997 Student Equity Plan Update incorporates a new section entitled Completed Goals. Although many goals have been met yet require ongoing efforts and are therefore not included in this section, this section allows the district to review its completed accomplishments.

Campus Climate

Research Implications

The California Postsecondary Education Commission (CPEC) published three documents (1990-1992) in which it examined the relationship between campus climate and student equity. These documents respond in part to Assembly Bill 4071 (Vasconcellos, 1988), which directed the Commission to investigate the feasibility of developing an educational assessment system for California higher education. CPEC recommends that all California institutions of higher education assess campus climate as it relates to equity in order to assure that all historically underrepresented students feel welcome and supported in their pursuit of educational advancement.

The purpose of Campus Climate research at Mt. San Jacinto College was to assess the extent to which MSJC campuses provide a welcome and supportive environment for students of special groups. These groups include ethnic groups, racial groups, women, disabled students, and a variety of groups which were addressed less comprehensively, including gays and lesbians and age groups.

In 1995, questionnaires were administered to students in two ways: by mail (former, current, and potential students) and in classrooms (Summer, 1995). Questionnaires for full-time faculty and all staff were administered during the Fall Pre-College meeting (1995), and additional surveys were distributed to all offices to assure that all staff were able to participate.

Additionally, a memorandum was sent to all managers, faculty, staff, ASB, and student clubs inviting suggestions for enhancing campus climate, and interviews were conducted of faculty and staff who could provide additional information in relation to the assessment of campus climate. For the 1996 and 1997 student equity plan updates, memorandums were again sent to all faculty, managers and staff inviting their input toward the enhancement of campus climate and student equity within the Mt. San Jacinto Community College District. The suggestions generated by the interviews and memoranda were incorporated into the Barriers, Implementation Strategy, and Accountability sections of the report.

Research Summary

Questions:

- Does Mt. San Jacinto College provide a welcoming and supportive environment?
- Do students experience bias?
- Is the campus climate friendly and welcoming to faculty and staff?
- Do faculty and staff (including administrators and managers) provide a friendly and welcoming environment?

Conclusions:

- Mt. San Jacinto College is a friendly and welcoming place for most students and faculty according to questionnaire responses.
- Most students from special groups expressed a need for further multi-cultural enrichment.
- Significant discrepancies exist within faculty concerning demographic representation, equality for student groups, and sexist and racist behaviors.
- A significant number of faculty respondents expressed a distinct disinterest in attending workshops concerning special groups.
- A significant portion of staff respondents expressed that disparaging comments, sexist and racist behavior, and rude treatment existed within faculty, staff, and administration.
- Assessment of campus climate was more neutral for staff.

Goal: To enhance the campus climate at MSJC so that all students and employees feel welcome.

Goal: To increase awareness of and sensitivity toward historically underrepresented groups among all students and employees.

.T

Student Access at MSJC

Access Research

The comparison of percentage of each group that is enrolled to the percentage of each group in the adult population within the community served.

Area Population	Percentages
Asian	2:93%
African American	3.42%
Hispanic	19.68%
Native American	1.24%
White	83.44%
Female	51.89%

Area population is based on projection of the 1990 census by zip codes within service area. As MSJC service area is determined by trustee areas (comprised of census tracts) instead of zip codes, these data cannot be considered entirely representative.

Hispanic grouping has been projected as an ethnicity and may therefore overlap with other race categories. Therefore, comparisons between area Hispanic population and MSJC Hispanic population cannot be considered entirely representative. Disabled data are unavailable.

Spring, 1995

MSJC Population	Male		Female		Total	
Asian	0.89%	n = 056	0.95%	n = 060	1.84%	n = 116
African American	1.76%	n = 111	1.52%	n = 096	3.29%	n = 207
Filipino	0.64%	n = 040	0.81%	n = 051	1.44%	n = 091
Hispanic	6.70%	n = 422	11.05%	n = 696	17.75%	n = 1118
Native American	0.86%	n = 054	1.62%	n = 102	2.48%	n = 156
White	24.43%	n = 1539	44.79%	n = 2821	69.23%	n = 4360
Pacific Islander	0.11%	n = 007	0.14%	n = 009	0.25%	n = 016
Disabled	1.89%	n = 119	2.56%	n = 161	4.44%	n = 280
Female					63%	n = 3996

MSJC Population represents Spring 1995 enrollment

Benchmark figures exclude Unknown and Decline to State categories; therefore, the total of the seven ethnicity/race groupings does not equal 100%. Disabled data represent only those students utilizing the Disabled Students Program and may therefore not be entirely representative.)

[&]quot;n" = the total number of students

Spring, 1996

MSJC Population	Male		Female		Total	
Asian/Pacific Islander	1.04%	n = 60	1.14%	n = 66	2.18%	n = 126
African American	1.84%	n = 106	1.52%	n = 111	3.36%	n = 217

Research Implications, 1995

California Community Colleges are designed to provide open access to all Californians who have graduated from high school as well as those who have not graduated but who are 18 years of age or older and can benefit from instruction. Mt. San Jacinto College, due to an enrollment cap which did not reflect its status as the second fastest growing district in the state, has been unable to adequately serve its community, which is growing rapidly and becoming increasingly diverse. According to projections of the 1990 census, the community Mt. San Jacinto College serves has grown by ten to twelve percent with a fairly even distribution by ethnicity and race. Consequently, ten to twelve percent of the population, regardless of ethnicity or race, has not been served. Due to increased funding for the 1996-97 year, Mt. San Jacinto College expects to experience rapid growth and to begin to serve that population.

Although Mt. San Jacinto College's enrollment appears to reflect the diversity of the community fairly well, the College is concerned that because of rapid growth in the services area, the census projection may not adequately reflect the diversity of the community. Funding limitations impacted outreach and recruitment efforts; however, the College is now working hard to expand these efforts.

Community representation of Asians, when compared to college enrollment of Asians, Filipinos, and Pacific Islanders, is slightly below (.13%) their representation in the community. Hispanics are 1.93% below their representation in the college; however, as Hispanic (as an ethnicity) overlaps with race categories, this number may not be entirely representative. Native Americans are represented at 1.24% above their numbers in the community. Women are represented at 12% above their numbers in the community.

Research Implications, 1996

Mt. San Jacinto College is still concerned that the census projection may not adequately reflect the diversity of the community and is hence planning to incorporate additional factors into a census projection slated for next year.

College representative of Asians and Pacific Islanders, African Americans, Filipinos, Hispanics, and Native Americans has risen slightly, with the greatest gains made by the Hispanic population (0.84%). The Disabled Student population has also increased slightly (0.56%). The gain in historically under-represented students represents a 3.93% increase in diversity for the college student body.

While the College is pleased that it has made progress toward both of its Access goals, increasing student diversity and increasing the college funding base are still considered to be of primary importance.

Research Implications, 1997

Mt. San Jacinto College is still concerned that the census projection may not adequately reflect the diversity of the community and has worked with additional census projection data in order to address this issue; however, as the MSJCCD is a rapidly changing district, additional work needs to be done.

The college district is anticipating that the 2000 census will reflect a much greater ethnic diversity than is reflected in available census projection data, not only because K-12 enrollments indicate greater diversity than available census projection data, but also because the district includes many affordable new housing developments which are attracting people of all ethnicities to the district. Therefore, MSJCCD will continue to seek to enhance diversity and to create an environment which welcomes students and potential students of all ethnicities.

The College has made excellent progress toward its Access goal to increase the college funding base and to consequently increase course offerings so that the district population can be better served. With the exception of students enrolled in the Disabled Students Program, enrollments for females and all ethnicities have increased. The enrollments in the Disabled Student Program, while down 1.9%, may be affected by the delay in testing such a large influx of new students and may therefore not be an accurate representation. Filipino, Native American, and Hispanic populations are down a fraction of a percent; Asians/Pacific Islanders and African Americans are up a fraction of a percent. Although the actual numbers of students increased for all ethnicities, including white students, the largest percentage loss was made by white students, down 3.6%. Female students were down a fraction of a percent.

Goal: To establish an ethnic distribution of enrollment that reflects the adult population of our service area by 2000

Goal: To increase college funding base so that all students, specifically historically under-represented students, have access to college

CESS	Implementation Strategy	Accountability	Taroet date	Evaluation Renchmarks

A. Need for additional signs on campus, more clearly marked buildings, and additional doors with labels	4.a Determine areas/funding for additional signs to both campuses and begin additional sign installation	4.b Business Services Student Services Facilities	4,c Fall, 1996—Current, ongoing with completion scheduled for Winter, 1999 for the MSJC campus	4.d Additional signs on both sites. Buildings on the San Jacinto Campus are now clearly marked with a building number which corresponds with the room numbers within the building. The Menifee Valley Campus needs to have the same system put in place. An infrastructure project designed for completion during Winter 1999 will address signage more fully. Increased signage is cheduled for the MVC campus in Fall 1007
				Our signs are mismatched with different type faces, different colors, inconsistent locations on buildings, etc. with no hint of a cohesive signage program, which could be a part of a larger visual identity program for the college (encompassing brochures, catalog, letterhead, vehicle markings, etc). Organizing an institutional identity campaign is a huge undertaking and is usually very costly.

Target date Evaluation Benchmarks	5.c Spring, 1996 Ongoing	nent Fall, 1998 or 1999 be a \$30,000 to \$50,000 electronic signboard for the front of the campus, which has been looked into. Advertising on the sign will allow for this purchase and is under consideration.	Additional marquee(s) in place. A new SJE marquee and an MVC marquee are definitely needed. The Information Officer is working with Facilities on this. No funds are currently available for a marquee for MVC. The SJC marquee is scheduled for replacement through deferred maintenance funds in 1998 or 1999.	6.c Current Ongoing, enhanced Ongoing, enhanced Community Relations — (The Publie Information Office provides switchboards on both campuses with information received, monthly calendars of events, copies of news releases, etc., to keep current. Effort to improve that is ongoing, especially in the area
Accountability	5.b Information Officer- Director of Government and Community Relations Information Officer	Director of Government and Community Relations Facilities		6.b Information Officer ASB Director of Government and Community Relations

				In Spring 1996, a survey (Wickwire) was conducted of 54 health care agencies and facilities within the Mt. San Jacinto Community College district. Findings from this survey, along with local meetings with members of the health care profession, confirmed the need for new allied health programs within the district. Additionally, reviews of national, state and regional labor market statistics and Eureka data provided confirmation regarding employment trends and projections. Reviews of existing educational institutions offering allied health related programs were also conducted. As a result of these studies, the allied health department developed new certificate/associate degree programs in Medical Assistant, Health Care Technician and Gerontology. Furthermore, new courses were developed in Phlebotomy and Home Health Care.

1994 enrolled signifies opening course enrollments.

% in English 60 represents a subset of 1994 enrolled: students who enrolled in English 60 during their academic career

% in English 98 represents the subset of % in Math 51 enrolled who completed English 98 within two semesters of having taken Math 51

(Benchmark figures exclude Unknown and Decline to State categories; therefore, the total of the seven ethnicity/race groupings does not equal 100%. Disabled data represent only those students utilizing the Disabled Students Program and may therefore not be entirely representative.)

[&]quot;n" = the total number of students

Research Implications, 1995

Successful completion rates in ESL/basic skills courses are an important indicator of student success, specifically for historically underrepresented student populatons. Statewide basic skills course completion rates tend to be lower than completion rates in all other course work areas. According to The Effectiveness of California Community Colleges on Selected Performance Measures (April, 1995), statewide completion rates were 4.4% for ESL courses and 9.3% for remediation/basic skills courses for Fall 1992. Presumably, the statewide rates for successful completion of degree-applicable course work in the discipline within a given number of semesters of having completed the final basic skills course would be significantly lower. Mt. San Jacinto College found that the lack of transfer level ESL course offerings compromised accurate assessment of student progress in ESL. Completion rates from final ESL courses (English 53/54), which are non-transferable, to the degree-applicable English course (English 98) are virtually non-existent, with 0.0006% being the highest average (Hispanic) for all ethnic groupings.

Basic skills course completion rates in English (within two semesters) are fairly evenly distributed, with a mean of 29.1%. Successful completon rates are highest for Pacific Islanders, whites, and African Americans, in that order. Completion rates are lowest for Asians, females, Native Americans, and Hispanics, in that order. The range between all groupings is 10.1%. The range between all groupings except for Pacific Islanders, whose group is comprised of three individuals and hence skews the sample, is 9.3%. No disabled students enrolled.

Successful course completion rates in math (within two semesters) have a range of 44.7%, with a mean completion rate of 36.6%. Distribution reflects significantly higher completion rates for Pacific Islanders, whose grouping is comprised of three individuals and hence skews the sampling. The range without this grouping is 24.2%. Whites have the second highest completion rate, though they fall 20.5% below Pacific Islanders. Asians and females are third at approximately 10..5% lower than whites. Lowest completion rates are held by Filipinos and Native Americans, whose rates differ by only 0.7%. These results display the importance of breaking Asians into as many categories as possible, as their success rates as well as their cultures differ widely. No disabled students enrolled in Math 51.

Research Implications, 1996

Basic math completion rates for Asians have remained within 1% of 1995 percentages. African Americans (at 3.14%) and whites at (7.75%) both experienced a drop in completion rates, whereas gains were made by disabled students (38.30%), Native Americans (6.57%), Hispanics (3.08%), Filipinos (2.3%), and female students (2.17%).

Basic English completion rates for African Americans fell by 6.36%, whereas gains were made by disabled students (34.39%), female students (10.62%), Native Americans (8.33%), whites (5.07%), Filipinos (4.18%), and Hispanics (1.49%).

While the goal of increasing successful completion has been surpassed by disabled students and met by Native Americans in math and English and by whites in English, the College needs to increase retention efforts. The drop in successful completion rates experienced by African Americans in both math and English is cause for concern.

41

Research Implications, 1997

Basic skills math and English completion rates for 1997 cannot readily be compared to those of 1996 because enrollment percentages in Math 51 are down overall in most cases, and most groupings have such small "n,s" that comparison would be irrelevant. For example, Filipino student completion rates are up 42%, but this represents a change from 5 to 4 completers. The same is the case for English course enrollees and completers. The extent of the fluctuations, in fact, as well as the small cohort sizes, reflect a need to change the goals from a 5% improvement for each grouping to a successful completion percentage range. Because MSJC experienced a recent growth increase and waived matriculation for many new students, students may have been less inclined to begin English and math coursework at these levels, beginning instead at the degree-applicable or transfer level. Therefore, the district needs to examine successful completion rates in degree-applicable and transfer level courses to determine whether or not there are indicators that this is the case. If so, the waiver of matriculation requirements may be at the expense of student success and should be reconsidered. If not, the reason for the drops in enrollments in basic skills courses will need to be further researched. Irrespectively, current goals will be further studied, and alternative goals will be considered for next year's plan.

- Goal: To improve by 5% a year the percentage of students who successfully complete the degree-applicable course in English (English 98) within six semesters of having completed the final ESL course
- Goal: To improve by 5% a year the percentage of students who successfully complete the degree-applicable course (English 98) within two semesters of having completed the final basic skills course (English 60)
- Goal: To improve by 5% a year the percentage of students who successfully complete the degree-applicable course (Math 90) in the discipline within two semesters of having completed the final basic skills course (Math 51)

Courses Enrolled represents the total number of courses taken by each grouping

(Benchmark figures exclude Unknown and Decline to State categories; therefore, the total of the seven ethnicity/race groupings does not equal 100%. Disabled data represent only those students enrolled in the Disabled Students Program and may therefore not be entirely representative.)

Research Implications, 1995

Successful course completion is an important measure of equity. Mt. San Jacinto College's successful course completion rates are highest for Asians and Filipinos, who share a 75% success rate. Successful course completion rates are second highest for whites and females at 69%. Disabled students succeed at 62%. Hispanics and Native Americans share a success rate of 60%. Lowest completion rates are held by disabled students, who succeed at 57%, by Pacific Islanders, who succeed at 53%, and by African Americans, who succeed at 51%. The range between all groupings is 24%.

Research Implications, 1996

Successful course completion rates are up slightly for African Americans (1.16%) and Hispanics (1.91%) and down slightly for whites (1.04%), Females (1.04%), and disabled students (1.58%). Asians and Native Americans are both down by three percent. Pacific Islanders succeed at 7.05% below last year, and Filipinos succeed at 12.34% below last year.

[&]quot;n" = the total number of students

The reasons for these drops is not clear and will need to be examined further. These results will be distributed college-wide for discussion and input.

Research Implications, 1997

A three year examination of successful completion rates reveals that successful completion is steadily dropping for Asians, with a drop from 75% to 68% (a total of 7%), while the population is slowly rising. Over the past three years, successful completion for African Americans has fluctuated from 51% to 52% to 50%, while the population is up slightly. The successful completion rates for African Americans remain the lowest; a full ten percentage points separate them from any other grouping. Completion rates for Filipinos are down a total of 13% over the course of three years, from 75% to 63% to 62%, while the population is up slightly. However, the "n" is fairly small, and inferences may not necessarily be made about population trends from this data. Hispanic completion rates have remained fairly consistent over the course of the past three years, with fluctuations from 60% to 62% to 61.5%, while the population is up slightly. Native American completion rates have fluctuated from 60% to 56.7% to 61.6% to display a fairly consistent completion rate over the course of three years; however, the "n" for this grouping, though rising slowly, is still quite small. Completion rates for whites have dropped slightly but steadily, from 69% to 68% to 64% for a total drop of 5%. The population, while fairly consistent between Spring 1995 and Spring 1996, was up quite a bit for Spring 1997. Completion rates for Pacific Islanders fluctuated substantially, from 53% to 46% to 62% for a total range of 16% fluctuation. Though the population is up somewhat, the very small "n" can be said to account for these dramatic fluctuations. Disabled program enrollee completion rates have fluctuated slightly from 62% to 60.5% and remained at 60.5% for Spring 1997. The population is down slightly for Spring 1997; however, as these data represent the disabled student population which is utilizing the Disabled Student Program, the data may not be entirely representative. Moreover, Spring 1997 was a semester of rapid and dramatic growth. Therefore, the drop in Disabled Student Program enrollees may actually be a representation of a program impacted by new students awaiting testing. Female successful completion rates have dropped over the course of the past three years, from 69% to 68% to 65% for a total loss of approximately 4%, while the population continues to rise.

Given the waiver of matriculation for many students for Spring 1997, it is possible that these data may not be entirely representative of actual trends, whether improvements or declines, as a greater number of students may have self-placed in courses in Spring 1997. However, the completion rates of African Americans, as they have remained a full 10% below all other groupings, require further examination so that intervention measures may be proposed.

Goal: To increase completion rates by 5% for each group

Goal: To reduce the difference between all groups to a maximum of 10% by 2000

Goal: To maintain standards of rigor throughout the process

Degree and Certificate Completion at MSJC

Degree and Certificate Research, 1994/1995 Academic Year

The total number of degrees and certificates awarded to the ethnic distribution of the recipients four years earlier.

MSJC Population	Degrees		Certificat	es	Total	
Asian	1.92%	n = 7	0.27%	n = 1	2.19%	n = 8
African American	1.37%	n = 5	0.55%	n = 2	1.92%	n = 7
Filipino	1.10%	n = 4	1.64%	n = 6	2.74%	n = 10
Hispanic	8.77%	n = 32	1.10%	n = 4	9.86%	n = 36
Native American	0.82%	n = 3	0.27%	n = 1	1.10%	n = 4
White	61.10%	n = 223	17.81%	n = 65	78.90%	n = 288
Pacific Islander	0.55%	n = 2	0.27%	n = 1	0.82%	n = 3
Female	55.62%	n = 203	15.89%	n = 58	71.51%	n = 261
Disabled	3.01%	n = 11	0.0%	n = 0	3.01%	n = 11

MSJC Population represents averaged Fall 1991/Spring 1992 census enrollments

Research Implications, 1994/1995

Degree and certificate completion rates are consequential measures of student success and equity. At Mt. San Jacinto College, the most students to receive degrees and certificates respective to their enrollments four years earlier are females and whites, respectively, at 9.38% and 4.17% above their representation in the college. Filipino students (at 1.86% above), Native Americans (at 1.59% below), Asian/Pacific Islanders (at .68% below), and African Americans (at .78% below) are all within two percentage points of their enrollments four years earlier. Hispanic students are 4.3% below their representation in the college four years earlier. Consequently, Hispanic degree and certificate rates should be closely monitored, and intervention measures should be considered if these data remain consistent. Disabled enrollments are currently unavailable.

[&]quot;n" = the total number of students

Degree and Certificate Research, 1995/1996 Academic Year

The total number of degrees and certificates awarded to the ethnic distribution of the recipients four years earlier.

MSJC Population	Degrees		Certificate	es	Total	
Asian	2.78%	n = 11	0.51%	n = 2	3.28%	n = 13
African American	2.02%	n = 8	0.51%	n = 2	2.53%	n = 10
Filipino	2.02%	n = 8	0.76%	n = 3	2.78%	n = 11
Hispanic	11.87%	n = 47	1.52%	n = 6	13.38%	n = 53
Native American	2.53%	n = 10	1.52%	n = 6	4.04%	n = 16
White	57.58%	n = 228	13.13%	n = 52	70.70%	n = 280
Pacific Islander	0.0%	n = 0	0.0%	n = 0	0.0%	n =0
Female	57.07%	n = 226	11.61%	n = 46	68.69%	n = 272
Disabled	3.79%	n = 15	1.01%	n = 4	4.80%	n = 19

MSJC population represents averaged Fall 1992/Spring 1993 census enrollments

Research Implications, 1995/1996

Degree and certificate completion rates for all groupings except females are within two percentage points of their enrollments four years earlier. Female students receive degrees and certificates at 6.06% above their representation in the institution four years earlier, a drop of 3.32% in terms of their enrollment to completion ratios last year. Female students therefore remain MSJCs strongest cohort of degree and certificate completers. Filipinos (at 1.73%), American Indians and Alaskan Natives (at 1.26%), and Asians and Pacific Islanders (at 0.9%) all receive degrees and certificates at slightly above their representation in the college four years earlier. For American Indian/Alaskan Native and Filipino students, these percentage rates represent a change from last year's percentage rates of less than 0.35%. Asian/Pacific Islander students have gone from just below their representation last year (0.68%) to just above (0.99%) for a 1.67% increase in degree and certificate rates completion rates to enrollments four years earlier. White students experienced a drop in degree and certificate completion rates from 4.17% above their representation in the college four years earlier to 0.61% below their representation in the college four years earlier. This may in part be a function of their representation in the college, down from 78.9% to 70.7%. While white students complete within one percentage point of their representation, any further drops should be closely examined. African American students still complete at slightly below their representation in the college four years earlier, but rates are up from 0.78% below their representation to 0.67% below their representation. Hispanic students also still complete degrees and certificates below their representation in the college four years earlier, but rate differences have decreased from 4.32% below

[&]quot;n" = the total number of students

representation to 1.94% below representation. While this gain is impressive, degree and completion rates for Hispanics should still be closely monitored, as 1.94% below representation is the lowest below representation for all groupings. Disabled enrollments are currently unavailable, but disabled student completion rates have risen from 3.01% (n = 11) to 4.80% (n = 19). These data represent only those disabled students who have accessed the Disabled Students program and may therefore not be entirely representative.

Degree and Certificate Research, 1996/1997 Academic Year

The total number of degrees and certificates awarded to the ethnic distribution of the recipients for years earlier.

MSJC Population	Degrees		Certifica	tes	Total	
Asian	1.73%	n = 7	0.50%	n =2	2.23%	n = 9
African American	2.97%	n=12	0.74%	n =3	3.71%	n = 15
Filipino	0.74%	n = 3	0.25%	n=1	0.99%	n = 4
Hispanic	12.87%	n = 52	1.98%	n =8	14.85%	n = 60
Native American	2.72%	n = 11	0.50%	n =2	3.22%	n = 13
White	61.39%	n = 248	9.16%	n =37	70.54%	n = 285
Pacific Islander	0.0%	n =0	0.0%	n = 0	0.0%	n = 0
Female	55.69%	n =225	10.64%	n = 43	66.34%	n = 268
Disabled	5.20%	n =21	1.49%	n = 6	6.68%	n = 27

MSJC population represents averaged Fall 1993/Spring 1994 census enrollments

Research Implications, 1996/1997

Degree and certificate completion rates for all groupings have remained within two percentage points of their enrollments four years earlier, except for female students, who complete degrees and certificates at 4.25% above their representation. Degree and certificate completion rates for female students have therefore experienced a steady drop to enrollment rates over the past three years: from 9.38% to 6.06% to 4.25% above their representation in the college fours earlier, while their representation in the college has remained constant at 62%. While they still represent the strongest degree and certificate completer grouping, the reasons for this steady drop should be further examined. White (0.89%), American Indian/Alaskan Native (0.67%) and African American (0.45%) above) students all complete degree and certificates at slightly above their representation in the college four years earlier. White student completion rates have therefore experienced a drop, then remained fairly consistent over the course of three years: from 4.17% to 0.61% to 0.89% above their representation in the college. This may in part be a function of their drop in terms of representation over the course of the past three years: from 74.7% to 71.3% to 69.7% as the college continues to diversify. American Indian/Alaskan Native student completion rates have improved slightly over the course of the past three years: from 1.59% below to 1.26% above to 0.67% above their representation in the college four years earlier. The small "n" for this grouping makes population trends difficult if not impossible to determine. African American student degree and certificate completion rates have increased slightly over the course of three years: from 0.78% below

[&]quot;n" total number of students

African American student degree and certificate completion rates have increased slightly over the course of three years: from 0.78% below to 0.67% above to 0.45% above their representation in the college four years earlier.

Degree and certificate rates for Hispanic (at 1.7%), Asians/Pacific Islander (at 0.2%), and Filipino students (at 0.15%), are slightly below their representation in the college. In the case of the latter two groupings, the small "n" makes population trends difficult to determine. Hispanic student completion rates, while still the lowest in comparison to their representation in the college four years earlier, have made consistent gains over the course of the past three years: from 4.32% below to 1.94% below to 1.7% below their representation in the college. Asian/Pacific Islander and Filipino degree and certificate completion rates have remained within one percentage point of their enrollments in the college from years earlier. Currently, Asian/Pacific Islander students complete at 0.26% below, and Filipino students at 0.15% below their representations in the college four years earlier. Disabled enrollments are currently unavailable, but disabled student completion rates have risen steadily from 3.01% (n = 11) to 4.80% (n = 19) to 6.68% (n = 27). These data represent only those disabled students who have accessed the Disabled Students Program and may therefore not be entirely representative.

Overall, degree and certificate completion rates for each grouping have remained fairly consistent, with some slight decreases and increases. The college has therefore met one degree and certificate completion goal: to ensure that the ethnic distribution of degree and certificate recipients is within 2% of the enrollments four years earlier; the other goal, to increase by 10% a year the total number of degrees and certificates awarded, has not been met, but improvement has been made, with degree and certificate awarded increasing about one percentage point for the past two years. This goal may need to be examined by the Student Equity Committee to determine whether or not it should be altered or whether additional measures to increase degree and certificate completion rates should be undertaken. Possibly, a combination of both strategies would best serve the students of MSJC.

Goal: To increase by 10% a year the total number of degrees and certificates awarded

Goal: To ensure that the ethnic distribution of degree and certificate recipients is within 2% of the enrollments four years earlier

Please Note:

Due to discrepancies in year to year data reporting, the degree and certificate data reported for 1994/1995 and 1995/1996 academic years have been updated so that it can be assured that the same information has been utilized for each of the three academic reporting years contained herein. Information Services has provided the best information available; however, the data reported in this section is still under review.

Institutional Research is working to rectify any errors that may be contained in these data and requests that these data be considered preliminary until such time as they can be definitively confirmed. For clarification, or additional information, please contact Institutional Research at (909) 487-6752, extension 1301.

Native American	2.8%
White	71.3%

(Benchmark figures exclude Unknown and Decline to State categories; therefore, the total of the six groups does not equal 100%. As Disabled and Female rates are currently unavailable, they are not displayed in MSJC population.)

% MSJC Transfer Rates	95/96
Asian/Pacific Islander	6.1%
African American	4.2%
Filipino	0.9%
Hispanic	16.4%
Native American	1.9%
White	59.2%

(Benchmark figures exclude Unknown and Decline to State categories; therefore, the total of the six groups does not equal 100%. These data are provided by CPEC. Disabled and Female population data are currently unavailable.)

Research Implications, 1995

Education Code section 51027 requires that the governing board of each community college district recognize transfer as one of its primary missions, and that an emphasis shall be placed on the preparation and transfer of underrepresented students. Mt. San Jacinto College found that although it places great importance on transfer, and has established a successful Transfer Center, more needs to be done to increase transfer rates, specifically among historically underrepresented groups and ethnic minorities, as defined by Division 6 of Title 5, Subchapter 4, Section 54220.

At Mt. San Jacinto College, Asians and Pacific Islanders are transferring at slightly higher rates than their representation in the community and at the college. African Americans are transferring on par with their representation (1993/94) though transfer rates are below representation figures for the two proceeding years. African Americans are also transferring at slightly higher rates than their representation in the community. Native Americans are transferring at much lower rates than their representation in the college and slightly below their representation in the community, though their representation in the college is slightly higher than within the community. Whites transfer at rates slightly lower than their representation in the college.

Research Implications, 1996

Transfer rates are up less than 1% for African Americans and down less than 1% for Asian/Pacific Islanders and Filipinos. Hispanics experienced a 5% drop in transfer. Whites experienced a 3% increase in transfer. Although the College met its goal of ensuring the ethnic distribution of transfer students is within 2% of the enrollments four years earlier, the goal of increasing by 5% a year the number of students who transfer has not been met. The College must consequently increase its transfer efforts.

Research Implications, 1997

The district is pleased to report tht MSJC population averages from 91/92 to 92/93 are up for every ethnicity, except for Asian/Pacific Islander students, for which the enrollment averge remained constant. White students, however, have experienced a 3.4% drop in enrollment percentages as the district continues to become more diverse.

Transfer rates to the UC and CSU systems are also up for every ethnicity except Native Americans, who experienced a 0.4% drop in transfer rate. Whites have experienced a 5.3% drop; however, their transfer rate is 12.1% above their representation four years earlier. Asian/Pacific Islander transfer rates are 3.8% above their representation, African American transfer rates are 1% above their representation, and Hispanic transfer rates are 1.1% above their representation. Filipino transfer rates are 0.2% below their representation and Native American transfer rates are 0.9% below their representation in the college.

Although the college has not yet met the goal of increasing by 5% a year the number of students who transfer, the goal of ensuring that the ethnic distribution of transfer students is within 2% of the enrollments four years earlier has been met; although white students transferred at 12.1% above their representation and are therfore not within 2% of their enrollment four years earlier, the district is pleased when transfer rates exceed representation for any grouping. If other groupings do not soon approach this grouping's rate, however, the district will need to examine this issue further.

Goal: To increase by 5% a year the number of students who transfer

Goal: To ensure the ethnic distribution of transfer students is within 2% of the enrollments four years earlier

S. Need for increased faculty/front line personnel awareness of service areas and the variety of MSJC's student population	3.a Provide flex activity bus trips through service areas, specifically rural and low income areas so that faculty/front line personnel can be more aware of and sensitive to the needs of all MSJC students.	3.b Flex Committee Faculty	3.c Spring, 1997— Ongoing 15 January 1998	3.d Flex Handbook. Bus tours have been conducted twice before as part of the January flex program. These tours were conducted, though, when MSJC still operated its own bus. This service has been suspended at MSJC, and buses, contracted elsewhere, cost approximately \$500 per day, a pricy sum for a single Flex activity. However, the Flex Committee will look into securing funds for just such an activity in light of the Student Equity Committee's charge and recommendation. The Flex Committee has planned this event, scheduled to take place on 15 January 1998. Therefore, this goal has been met.
5.				

LA arriers	Implementation Strategy	Accountability	Target Date	Evaluation Benchmarks
Need for increased support for faculty to maintain currency in their disciplines	6.a Increase faculty skills/knowledge. Provide computer and multi-media presentation training	6.b Flex Committee Faculty	6.c Current Ongoing	6.d Flex Handbook One of the Flex Committee's main charges is to aid instructors in maintaining currency in their disciplines, and this is in part acomplished by maintaining and expanding currency in learning materials, equipment and by increasing faculty skills/knowledge. Past and present flex schedules show that any number of workshops satisfy these goals. The Flex Committee will maintain this focus.
DEGREE AND CERTIFICATE COMPLETION	E COMPLETION			
D. Need for research to determine disabled degree and certificate completion rates	5.a Research disabled degree and certificate completion rates	5.b Office of Research Institutional Research	5.c Current Ongoing	5.d Student Equity Report Underway: This process has been implemented into annual Institutional Research planning, and information is proided in the Student Equity Report each year. Therefore, this goal has been met. ✓

MSJC Annual Review Model

Student Equity goals and activities have become a component of MSJC's regular program review process. Each year, the Student Equity committee, aided by Institutional Research, produces a Student Equity Report based on ongoing research and assessment of campus climate, access, and success. The Student Equity Committee seeks input from all college areas and maintains representative membership. Although the 1997 Student Equity Report Update was produced without input from the Student Equity Committee, which took a hiatus for the 1996/97 academic year, the committee will resume this task when it reconvenes.

Faculty

FROM:

Dana Reece Baylard, Director of Research

DATE:

May 19, 1997

SUBJECT:

STUDENT EQUITY PLAN UPDATE

In August of each year, Mt. San Jacinto College updates its Student Equity Plan. This district-wide plan examines both quantitative and qualitative data which relate to student success. The quantitative components include completion rates, retention rates, and transfer rates of Mt. San Jacinto College students. Quantitative components include district-wide determination of barriers to student success and goals for addressing these barriers. These barriers and goals are determined by all managers, staff, and faculty who provide suggestions. Faculty input is essential to the success of this document.

Barriers and goals specific to faculty have been forwarded to Academic Senate, the English and math department chairs, the counseling department, the Curriculum Committee, and the Flex Committee, all of which have designated items in the Plan. Since many faculty may not have the opportunity for direct input through the aforementioned areas, I would like to offer each faculty member the opportunity to review and add barriers and goals to achieving equity for all students at Mt. San Jacinto College. The current barriers, implementation strategies, accountability, timelines, and evaluation benchmarks are outlined in the September 1996 Student Equity Plan Update. If you need a copy, please call me at extension 1376, and I will either send you one or put one on reserve at your campus library.

The more faculty input we receive, the more accurately the Student Equity Plan will reflect student needs as faculty perceive them. Please return suggested changes and additions to me by 18 July 1997. If you have any questions or concerns, do not hesitate to contact me (x1376). Thank you.

STUDENT EQUITY PLAN UPDATE - REQUEST FOR ACTION

Each year, Mt. San Jacinto College updates the annual Student Equity Plan. This district-wide plan examines both quantitative and qualitative data which relate to student success. The quantitative components include completion rates, retention rates, and transfer rates of Mt. San Jacinto College students. Quantitative components include district-wide determination of barriers to student success and goals for addressing these barriers. These barriers and goals are determined by all managers, staff, and faculty who provide suggestions. Faculty and student input is essential to the success of this document. Within the enclosed packet are highlighted barriers and goals that fall within your area.

Please take a few moments to review these barriers and goals with your colleagues and update them as appropriate. Also, please check timeliness and accountability for accuracy and appropriateness. If you identify additional barriers and goals that should be included, please list them.

The more input we receive, the more accurately the Student Equity Plan will reflect student needs as you perceive them. Please return suggested changes and additions to me by 18 July 1997. If you have questions or concerns, do not hesitate to contact me (x1376). Thank you.

Inter-Office Memorandum

TO:

All Full-Time Employees

FROM:

Dana Reece Baylard, Director of Research

DATE:

August 22, 1997

SUBJECT: STUDENT EQUITY

In May, all full-time employees were sent a memo requesting input for the annual Student Equity Plan. Additional memos went to all the individuals and departments named in the plan. We received some excellent input and ideas but would benefit from additional input.

Therefore, if you have done anything to enhance student equity or if you are planning to, we would love to hear from you. Your suggestions/input do not need to be anything more than a note scribbled on the bottom of this memo and returned to me. We will work to integrate all suggestions and activities received this month into this year's plan.

Thank you for your contribution.
